Focus on Your Business, Not Your IT Environment

Colocation from Unleashed Technologies

Free yourself from the burden of managing and updating your hosting environment by colocating with Unleashed Technologies. Our Tier III data centers deliver the security, power, and bandwidth you need at a fraction of the cost for hosting a similar environment yourself.

By colocating in the Unleashed Technologies SOC 2, Type II, and SOC 3 (SSAE-16) compliant data centers, you will gain access to:

- **N+2 redundancy** for 99.999% uptime
- **Redundant power and cooling** with 36" raised floors for high density deployments
- **Plentiful bandwidth** delivered through a diverse fiber infrastructure with multiple Tier 1 providers
- **71,000 sq. ft. of space** with room to grow
- **Easily configurable space** with air containment and hot and cold aisle options available
- **Scalable power distribution** so that increases in demand do not require server relocation

Managing Your Needs

Unleashed Technologies provides managed services, including managed firewall, backup program, and other support services to suit your specific hosting needs. Unburden your internal IT resources by leveraging the services of our dedicated professionals to keep your network infrastructure performing. Strict SLAs and a 24x7x365 service program ensure that you receive superior support, at all times.

Colocating with Unleashed Technologies enables you to retain the control over your servers that you want in an enterprise-class environment you can afford.

Very Convenient – Very Secure

Unleashed Technologies has a nationwide data center presence that offers a diverse fiber network and many options for you when considering colocation. Choose from one of our Tier III data centers strategically located throughout the United States:

- **Ashburn, Virginia**
- **Austin, Texas**
- **Chicago, Illinois**
- **Denver, Colorado**
- **Fremont, California**
- **Irvine, California**

Each data center has its own unique features, but all offer enterprise-class security, 24x7x365 on-site support, and industry-leading network infrastructures. Your colocation environment comes with primary and redundant power as well as unmetered bandwidth over Tier I providers.
