

Enterprise Solutions for Small Business Budgets

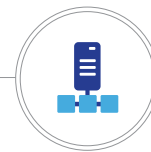

Small Business Solutions from Unleashed Technologies

In today's world, reliable access to data, software and systems is critical for your business to succeed. For most small businesses though, building and maintaining a robust IT solution to support ever-expanding resource demands isn't in the budget. With Unleashed Technologies, you can have reliable and affordable access to the resources you need from a state-of-the-art data center.

Unleashed Technologies has enterprise-class Tier III data centers built on industry-leading VMware, with guaranteed 99.999% uptime and staffed 24x7x365 with live hosting experts to support your organization. With Unleashed Technologies, you will:

- **Have reliable access to your data** – Whether you decide to leverage our virtual private servers (VPS) or colocation capabilities, you will have dependable, secure access to your hosted data.
- **Reduce licensing fees and increase flexibility** – Microsoft Office SPLA licensing not only delivers the software you need at a lower monthly cost, but you can add or remove users at any time.
- **Only pay for what you use** – We right size your hosting solution to ensure accurate pricing.

Our hosting solutions are offered at wholesale prices, so you get enterprise-class hosting and support at small business prices. No matter how you choose to leverage Unleashed Technologies, your dedicated account manager or our senior-level support staff proactively work to resolve issues and will be available should you need assistance.
